

Optimism

Optimism is what we need today.

Optimism is what empowers us to take risk and do that which we fear to do. In the doing is the death of the fear. In the doing is the accomplishment and the satisfaction.

With the worldwide economic crisis we need to be optimistic and move forward.

Money is round to keep it moving.

If we all stop spending, talk lack and loss, it will be a self fulfilling prophesy.

We have a choice and we can make it all work; or we can bring the economy to a halt.

Yes, let's keep spending and doing what we need to do. No, not waste money and not spend recklessly. But, take advantage of the opportunity. Expand, be optimistic, and do what you need to do.

Now is the time to move forward. Now is the time to do what you intend to do. Now is the time to move forward with confidence and optimism. Now is an opportunity and those who take advantage will be glad they did.

Sure, there is risk and there is always risk. Right now we are sensitive to the risk. Perhaps we should have been weeks and months ago.

We are where we are. Today is a new beginning. You cannot change the past but you are in control of your future. So, today is a day of opportunity and optimism.

As long as you have your health and ability to create you can not only survive but prosper. Ideally, you will prosper and bring others along with you. Now is the time for all parties to win rather than a few winning at the expense of others.

There is much to be optimistic about. There are still great needs to be filled and there are people who are and will buy.

So, if we all move forward with optimism and confidence we will be fine. While unemployment is high two family members of mine have just gotten jobs. There is almost always a job. There are always opportunities.

Be optimistic, act it and live it. You will find it.
